

Keith Nelson, AIA

Keith Nelson is the technical lead for the Building Enclosure Commissioning and Enclosure Consulting Practice Areas within the Building Science Group at Intertek-Architectural Testing. Keith is a registered Architect with 16 years of experience providing critical evaluation of design details and field review of new and existing building enclosure projects. He has been involved in a broad range of projects throughout North America with services including enclosure evaluation, detailing, design and product submittal review, construction phase observation and evaluation, below-grade waterproofing investigation, testing and repair, and building code analysis. He is a graduate of Ball State University with a Bachelors of Architecture and a Bachelor of Science in Environmental Design.
